

## COVID-19 RNA MOLECULAR TESTING

We offer several different tests to aid in the diagnosis of the SARS-CoV-2 RNA coronavirus (COVID-19)

1. **ABBOTT ID NOW RAPID Nucleic Amplification Test**- this test involves performing a nasal swab in each nostril. Test results will be available within **10-15 minutes**. You will be given a printed off copy of your results if you need to provide this for travel, work, etc. This test is not covered by most commercial health insurances. Studies have shown that the accuracy of the Abbott test is equivalent to the nasal swabs that are sent to the lab for processing.

I agree that the part of Abbott ID Now COVID 19 rapid test is not a covered benefit of my health insurance carrier. I acknowledge that I will be financially responsible in the amount of \$85.00 to cover the cost of the COVID 19 diagnostic Test. By signing this document, I am agreeing to pay for these services prior to such services being rendered.

2. **SARS-CoV-2 Nucleic Amplification Test** (run through Pathnostics Labs or Quest)-this test also involves performing a nasal swab in each nostril. Test results should be available in **@ 3-5 days**. You will be provided a copy of the results through your E-mail. This test **may** be covered by your health insurance (this could be affected by the type of health insurance you have and if you have previously undergone COVID testing).

I agree that this NAAT COVID-19 Test may not be covered my health insurance carrier. In the event that it is not covered, I acknowledge that I may receive a bill from Pathnostics Labs/Quest Labs in the amount of \$100.00 and I will be financially responsible to cover the cost of this COVID 19 diagnostic test.
